🐙 <https://github.com/SharmaG-Dev>

Full Stack Developer with 3.5+ years of experience building scalable web applications using Node.js, Next.js, and PostgreSQL. Skilled in designing microservices, real-time systems, and AI-powered solutions using LLM integrations. Experienced in developing high-performance APIs, implementing booking and queue-based architectures, and integrating payment systems (Stripe, Razorpay). Proven expertise in AWS cloud deployment, database optimization, and delivering production-ready applications in Agile environments.

WORK EXPERIENCE

Zonvoir Technologies
Pvt Ltd
May 2024 – Present

MERN Stack Developer

- Integrated Generative AI (LLM APIs) to build intelligent features, improving user interaction and automation workflows
- Designed and implemented microservices architecture, increasing system scalability and maintainability
- Built scalable applications using Next.js, NestJS, Strapi, and PostgreSQL
- Improved API performance by ~30–40% through caching, indexing, and query optimization
- Utilized Prisma ORM for efficient database management, query optimization, and schema design
- Implemented secure authentication (JWT, OAuth) ensuring robust access control
- Managed database operations using Prisma ORM, optimizing schema and queries
- Collaborated in Agile teams to deliver production-ready features on schedule

Trickle Solutions
June 2023 – March 2024

Full Stack Developer

- Developed full-stack applications using React.js, Node.js, MongoDB
- Built and optimized REST APIs serving real-time and high-traffic use cases
- Designed and implemented robust RESTful APIs using Node.js and Express.js
- Implemented real-time features using Socket.io, improving user engagement
- Optimized application performance through code refactoring, caching strategies, and database indexing, significantly reducing load time
- Integrated third-party APIs (payments, analytics, social platforms)
- Reduced application load time by ~35% through performance optimization
- Delivered multiple projects end-to-end (development → deployment)

G Net Technologies Pvt
Ltd
June 2022 – June 2023

Full Stack Developer

- Developed scalable backend services using Node.js and Express.js
- Built reusable UI components with React.js
- Designed secure authentication and authorization systems
- Improved performance via caching and optimized queries

Cosmo Info Solutions
May 2021 – Dec 2021

Django Developer

- Built backend systems using Django and Python
- Developed REST APIs and authentication modules
- Delivered stable and maintainable web applications

SKILL

Languages: JavaScript, TypeScript, Python

Backend Development: Node.js, Express.js, Strapi , Nest js , Microservices.

Frontend Development: React.js, Next.js, T3 Stack,Vue Js

Databases: PostgreSQL, MongoDB , MySQL , Firebase

Cloud & Deployment: AWS (EC2, Deployment) ,Nginx Reverse Proxy ,Docker,Linux (Ubuntu), VPS , CI /CD

Other Technologies: Redis, Socket.io, WebRTC, Microservices , Gateway Integrations , AWS (S3 , RDS, EC2) Google Apis Integrations

AI: LLM APIs (OpenAI), Prompt Engineering, AI Agent Development & Integration

PROJECTS

AI Sales Agent – Conversational Automation System

Roles & Responsibilities

- Built an AI-powered sales agent using OpenAI (ChatGPT) for automated customer interaction and service recommendations.
- Designed prompt-driven logic to understand user needs and suggest relevant solutions.
- Implemented backend workflows to capture user inputs and update records in the database.
- Enabled intelligent, real-time assistance to improve lead handling and user engagement.

Hotelirooms - Hotel Management System (Similar to OYO)

www.hotelirooms.com

Roles & Responsibilities

- Developed a full-stack hotel management platform using MERN (MongoDB, Express.js, React.js, Node.js).
- Designed and implemented scalable backend architecture, REST APIs, and database schema for bookings, users, and hotels.
- Built responsive frontend and integrated it with backend services for seamless user experience.
- Implemented real-time booking updates using WebSockets and a queue system to manage concurrent requests.
- Integrated AWS EC2 for deployment and AWS S3 for media storage and asset management.
- Configured SMTP services for transactional emails like booking confirmations.
- Implemented Firebase Push Notifications for real-time alerts and user engagement.
- Managed end-to-end development lifecycle including development, integration, deployment, and maintenance.
- Integrated CCAvenue payment gateway for secure online transactions.

OW Care - Our Why Care Service

www.ourwhy.org

Roles & Responsibilities

- Solely developed a full-stack care service platform using Next.js (App Router), Prisma, and PostgreSQL.
- Designed scalable backend using Next.js API routes and structured database models with Prisma ORM.
- Built booking system with queue management to handle concurrent user requests efficiently.
- Integrated Stripe payment gateway, including Express Dashboard for managing user transactions and payouts.
- Developed interactive admin dashboard and optimized UI using Redux, ShadCN, and Tailwind CSS.
- Implemented secure authentication, payment workflows, and state management across the application.
- Deployed application on AWS (EU servers) ensuring performance, scalability, and reliability.

Love Birds - Dating App (Product)

Roles & Responsibilities

- Developed backend services using Next.js API routes to support mobile application features and workflows.
- Designed and built a comprehensive admin dashboard with data visualization and user/activity management.
- Integrated Firebase ecosystem including Firestore, Realtime Database (for messaging), Storage, and Authentication (mobile & email).
- Implemented real-time chat system and media handling using Firebase services.
- Utilized Firebase Cloud Functions for server-side logic, including video call integration (Agora-based).
- Managed Firebase hosting and deployment for web components of the platform.
- Contributed to scalable architecture and end-to-end feature implementation for a production-ready dating product.

SS Quick Helpers - Service Booking Platform

Roles & Responsibilities

- Developed a full-stack service booking platform using MERN (MongoDB, Express.js, React.js, Node.js).
- Designed complete website UI/UX and ensured responsive, user-friendly interfaces.
- Built and managed backend logic, including REST API development and business workflows.
- Structured and maintained database for service listings, users, and bookings.
- Integrated Razorpay payment gateway for secure online transactions.
- Deployed and managed application on AWS EC2 for reliable hosting and performance.

EDUCATION

Master of Computer Applications (MCA)	2019-2022
Himalayan Garhwal University	
PGDCA - Post Graduate Diploma in Computer Applications	2018-2019
Himalayan Garhwal University	
Bachelor of Commerce	2015-2018
University Of Lucknow	

CERTIFICATIONS

MERN STACK	Feb 2022 - Apr 2022
Project Traning & Internship	
Digipodium
